To be published by Springer

Developing Students' Statistical Reasoning: Connecting Research and Teaching Practice

Joan Garfield, *University of Minnesota, USA*

Dani Ben-Zvi, *University of Haifa, Israel*

With Contributions from

Beth Chance and Elsa Medina

California Polytechnic State University, San Luis Obispo, California

Contents

Foreword	Roxy Peck	vii
Preface	Joan Garfield and Dani Ben-Zvi	ix
Part I.	***The Foundations of Statistics Education***	1
Chapter 1	The Discipline of Statistics Education	3
Chapter 2	The Research on Teaching and Learning Statistics	39
Chapter 3	Creating a Statistical Reasoning Learning Environment	79
Chapter 4	Assessment in Statistics Education	111
Chapter 5	Using Technology to Improve Student Learning of Statistics	157
Part II.	***From Research to Practice: Developing the Big Ideas of Statistics***	195
Introduction to Part II	Connecting Research to Teaching Practice	197
Chapter 6	Learning to Reason about Data	207
Chapter 7	Learning to Reason about Statistical Models and Modeling	241
Chapter 8	Learning to Reason about Distribution	275
Chapter 9	Learning to Reason about Center	311
Chapter 10	Learning to Reason about Variability	333
Chapter 11	Learning to Reason about Comparing Groups	357
Chapter 12	Learning to Reason about Samples and Sampling Distributions	391
Chapter 13	Learning to Reason about Statistical Inference	431
Chapter 14	Learning to Reason about Covariation	479
Part III.	***Implementing Change through Collaboration***	513
Introduction to Part III	The Role of Collaboration in Improving Statistics Education: In Learning, in Teaching, and in Research	515
Chapter 15	Collaboration in the Statistics Classroom	517
Chapter 16	Collaboration in Teaching and Research	537
	Table of Activities	540
	Author Index	542
	Subject Index	543
